

## Department of Health

### Message from Department of Health Toxicologist:

During the most recent sampling event at this beach, the chemicals of concern (COC) were not detected in the water near shore.

These test results indicate that swimming does not pose a risk of exposure or adverse health effects associated with petroleum contaminants.

During the most recent sampling event at this beach, the chemicals of concern (COC) were not detected in the beach sands (sediments).

These test results indicate that recreational activities on this beach does not pose a risk of exposure or adverse health effects associated with petroleum contaminants.
